

Invitation to Debate: Should gender analysis be embedded in epidemic responses?

Hilda Bustillo Garfias <hildabu@uadec.edu.mx>

Mar 21/04/2020 04:31 PM

Se adjunta invitación de SciDev.net a participar en el debate *Should gender analysis be embedded in epidemic responses?* el cual se llevará a cabo el día de mañana miércoles a las 14 horas GMT, (9:00 horas de la ciudad de México).

Se anexa información.

SciDev.Net wishes to invite you to a special interactive debate that will be streamed over zoom.

Title: _____

Join expert panellists and the global science and development community on **Wednesday, 22 April, at 2pm GMT** as we debate whether gender should be central to epidemic management. Women are on the coronavirus frontlines as healthcare workers and primary caregivers, but policy responses often fail to consider how gender and epidemics interact.

In this special SciDev.Net debate, we will consider: Are more men dying of COVID-19 than women? Are women at greater risk of violence in lockdown? In stretched health systems, who will receive priority care and who could miss out? And why is sex disaggregated data central to all these questions?

Simply follow this [link](#) to join the debate, get more information or register to have the event added to your calendar.

The panel will include:
Sarah Hawkes, Global Health 50/50
Roopa Dhatt, Women in Global Health
Blessing A. Odogwu, University of Port Harcourt
Giampiero Favato, Kingston University London.

If you have any questions, please contact – _____ .

I wish you and your teams good health in these difficult times.

With best regards,

Ben Deighton,
Managing Editor
